Category	Excellent 4 Points	Good 3 Points	Satisfactory 2 Points	Needs Improvement 1 Point
Technology How advanced and effective is the use of technology in the project?	The technology used is cutting-edge or superbly applied to solve the problem. It shows a high level of complexity and sophistication.	The technology used is effective and serves the purpose well, though it may not be particularly innovative or advanced.	The technology used is adequate for the purpose but lacks the complexity or innovation that could elevate the project.	The technology used is basic or insufficiently applied to the project's needs.
Presentation Clarity, engagement, and professionalism of the presentation	The presentation is clear, engaging, and professional. It effectively communicates the project's value and workings.	The presentation is clear and professional but may lack in engagement or creativity.	The presentation conveys necessary information but lacks clarity, engagement, or professionalism.	The presentation is unclear, unengaging, and does not professionally represent the project.
Innovation/ Creativity Originality of the idea and creative problem-solving	The project demonstrates a novel approach and creative problem-solving with exceptional outcomes.	The project includes creative elements that are above average but may not be groundbreaking.	The project shows some creativity but it's largely conventional or derivative.	The project lacks original ideas or creativity, follows common solutions without innovation.
Execution Quality of the implementation and how well the project functions	The project is exceptionally well-implemented with flawless functionality and polished finish.	The project functions well with minor issues or areas for improvement.	The project functions with noticeable issues that could be improved.	The project has significant issues in functionality that hinder its performance.
Theme Relevance to the hackathon theme and integration of the theme in the project	The project excellently incorporates the hackathon theme in a meaningful and integral way.	The project includes the theme but could integrate it more deeply or creatively.	The project addresses the theme but only superficially or minimally.	The project barely addresses or neglects the hackathon theme.
